

Jetico Central Manager

Administrator Installation Guide

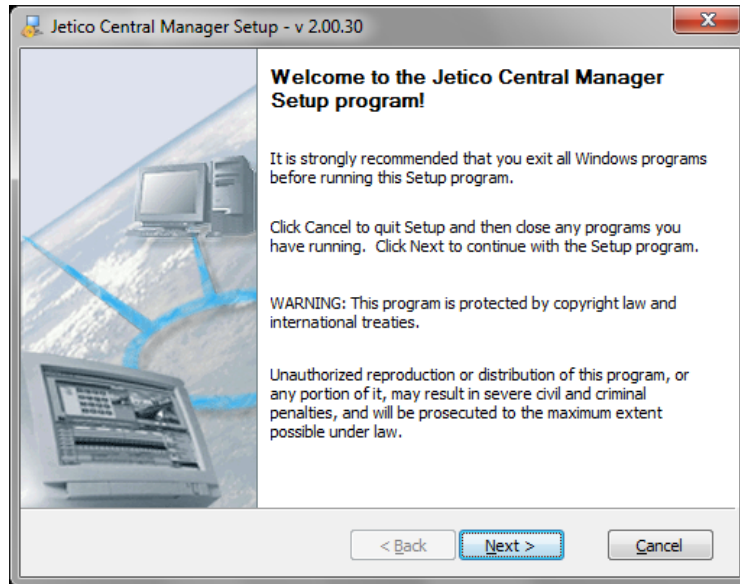

Protection made perfect.

- > Included in Enterprise Editions of Jetico software
- > Actively control Jetico's BCWipe and BestCrypt software throughout your enterprise network with a flexible, unified administration tool
- > Take command of all wiping and encryption functions:
 - Remotely Deploy and Install
 - Configure and Assign tasks and policies
 - Modify existing tasks and policies on a single computer or on multiple computers simultaneously
 - View and Store logs and recovery info in central database

- > Download and install Jetico Central Manager (JCM) executable file:
www.jetico.com/jetmgr2.exe
- > Install JCM Database and Console
- > JCM will automatically download client software (BCWipe, BestCrypt)
- > Add client computers to the database
- > Deploy the software on the client computers

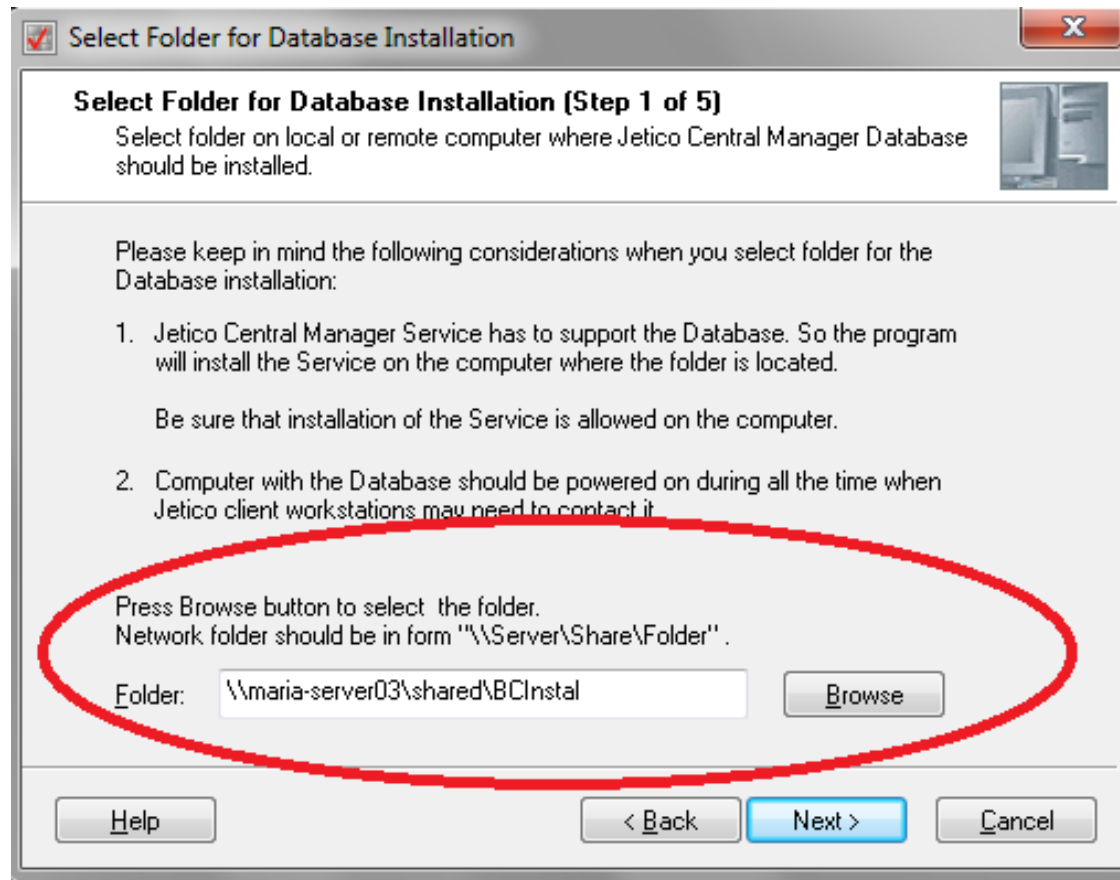

- > Run JCM executable file and follow setup steps
- > Once installation of JCM Console is complete, check box to 'Run Jetico Central Manager now' to install Database
- > Click **Finish**

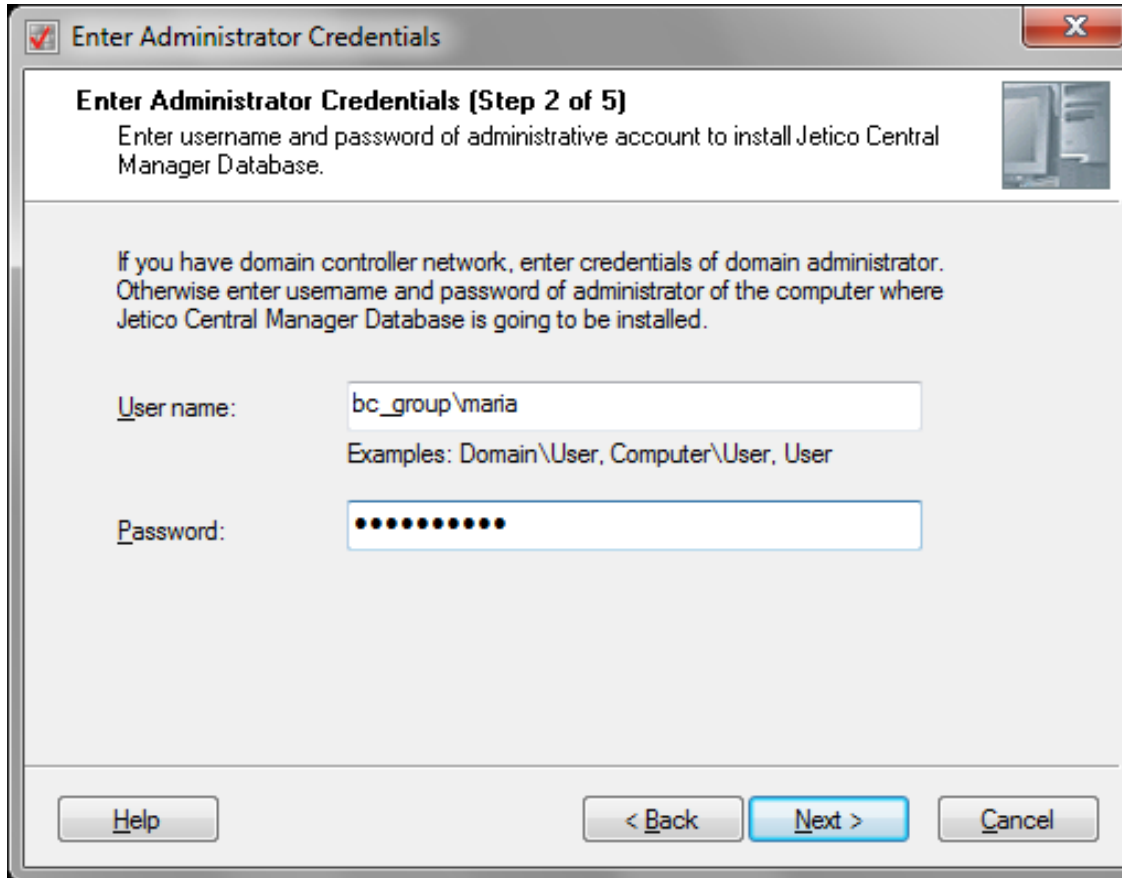

> Click **Next** to start installing JCM Database

> Enter server name and path where JCM Database should be installed

Enter Administrator Credentials

Enter Administrator Credentials (Step 2 of 5)
Enter username and password of administrative account to install Jetico Central Manager Database.

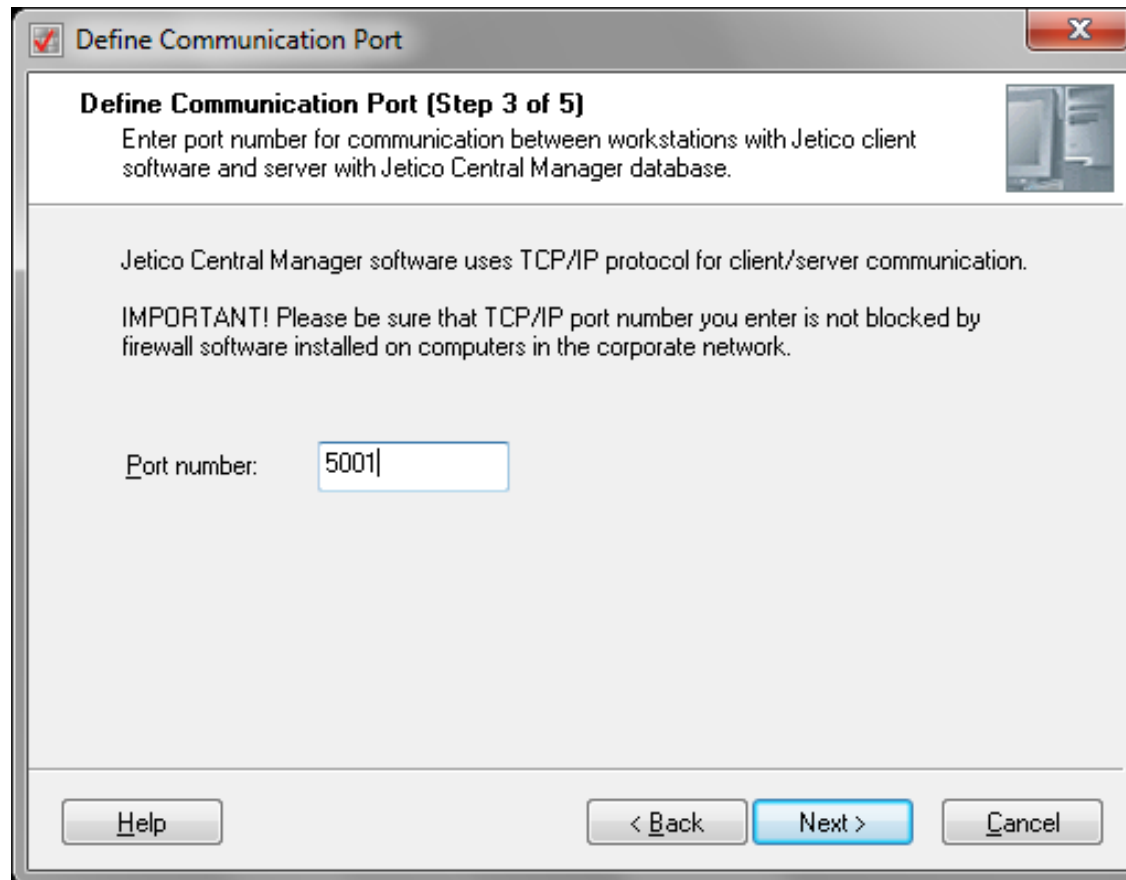

If you have domain controller network, enter credentials of domain administrator. Otherwise enter username and password of administrator of the computer where Jetico Central Manager Database is going to be installed.

User name:
Examples: Domain\User, Computer\User, User

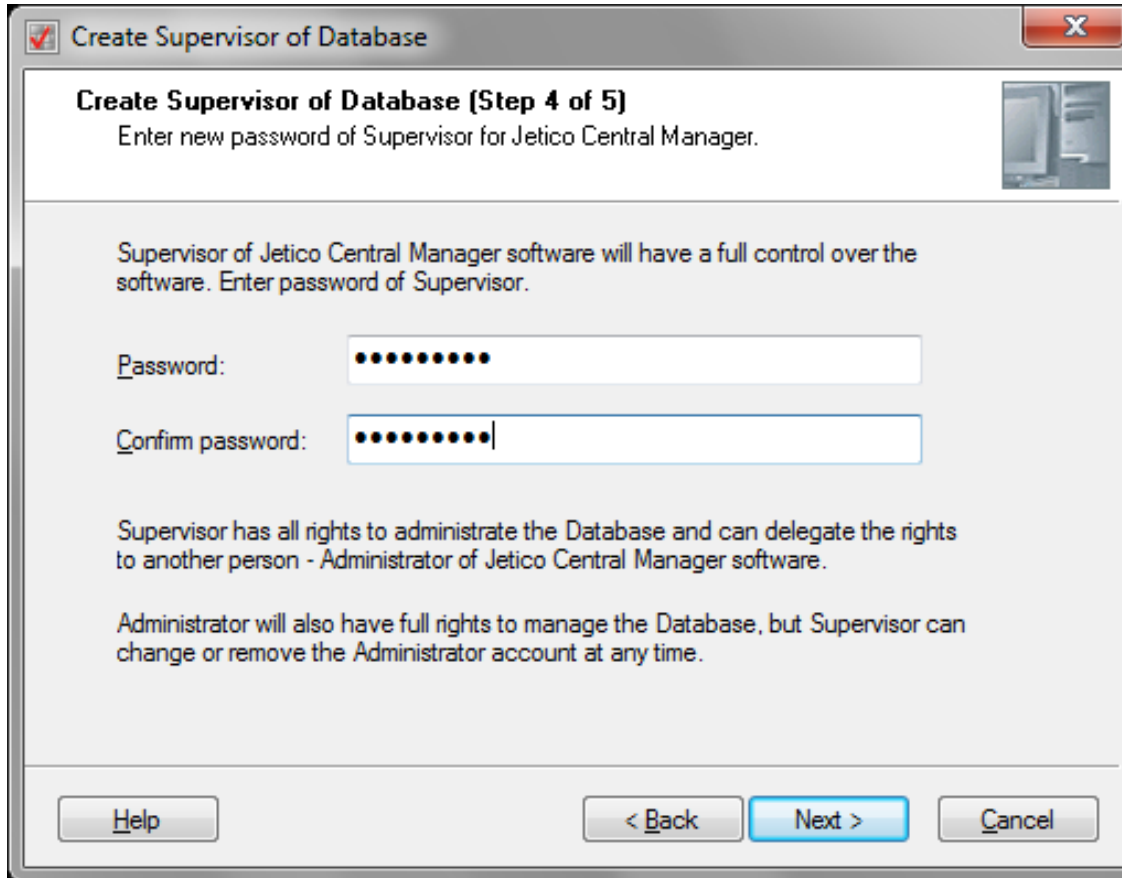

Password:

Help < Back Next > Cancel

- > Enter Administrator User name and Password

> Enter Port number

Create Supervisor of Database

Create Supervisor of Database (Step 4 of 5)
Enter new password of Supervisor for Jetico Central Manager.

Supervisor of Jetico Central Manager software will have a full control over the software. Enter password of Supervisor.

Password:

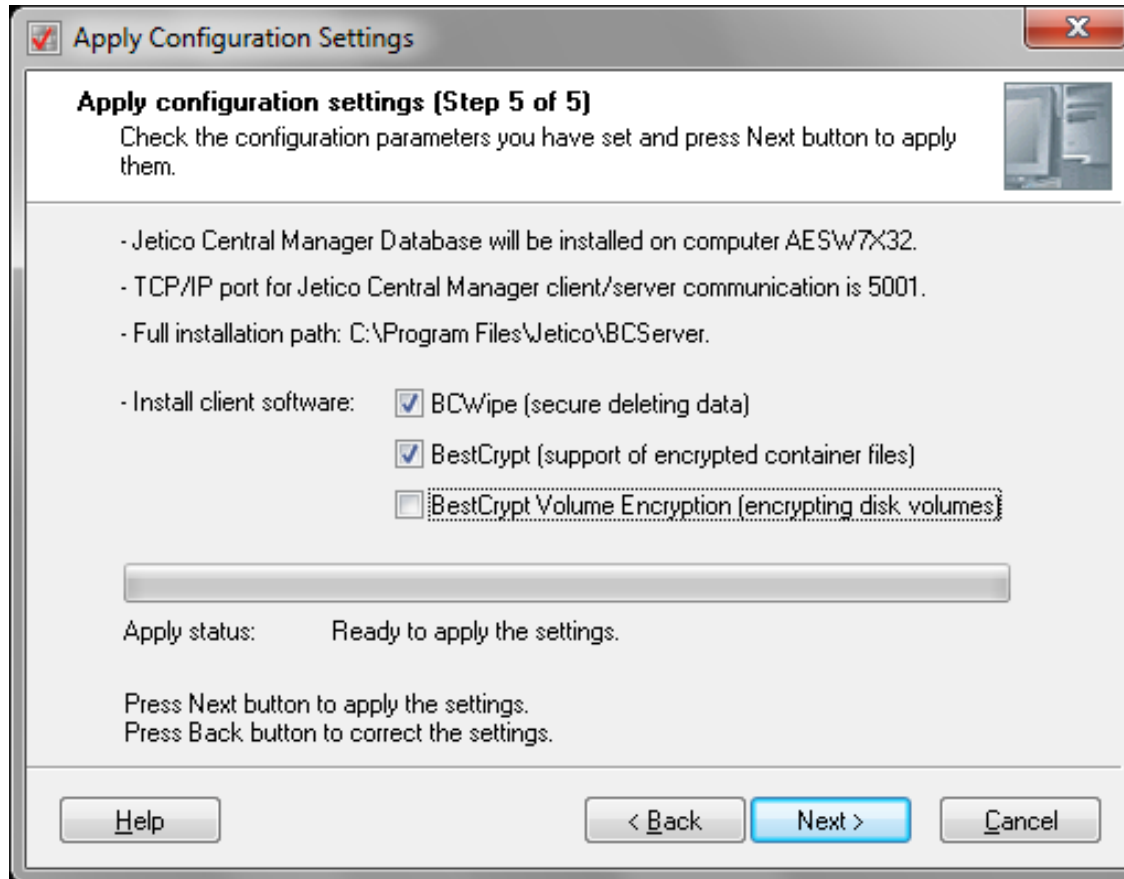

Confirm password:

Supervisor has all rights to administrate the Database and can delegate the rights to another person - Administrator of Jetico Central Manager software.

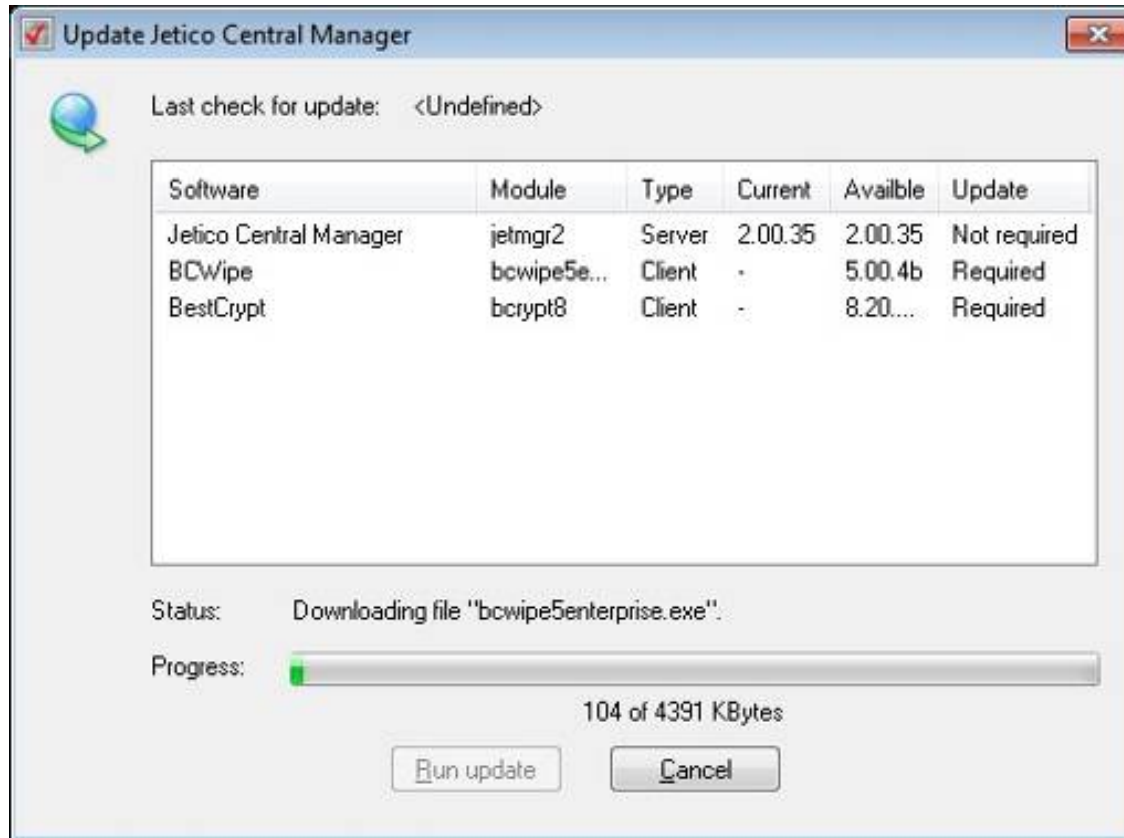

Administrator will also have full rights to manage the Database, but Supervisor can change or remove the Administrator account at any time.

[Help](#) < Back Next > Cancel

> Enter and confirm password

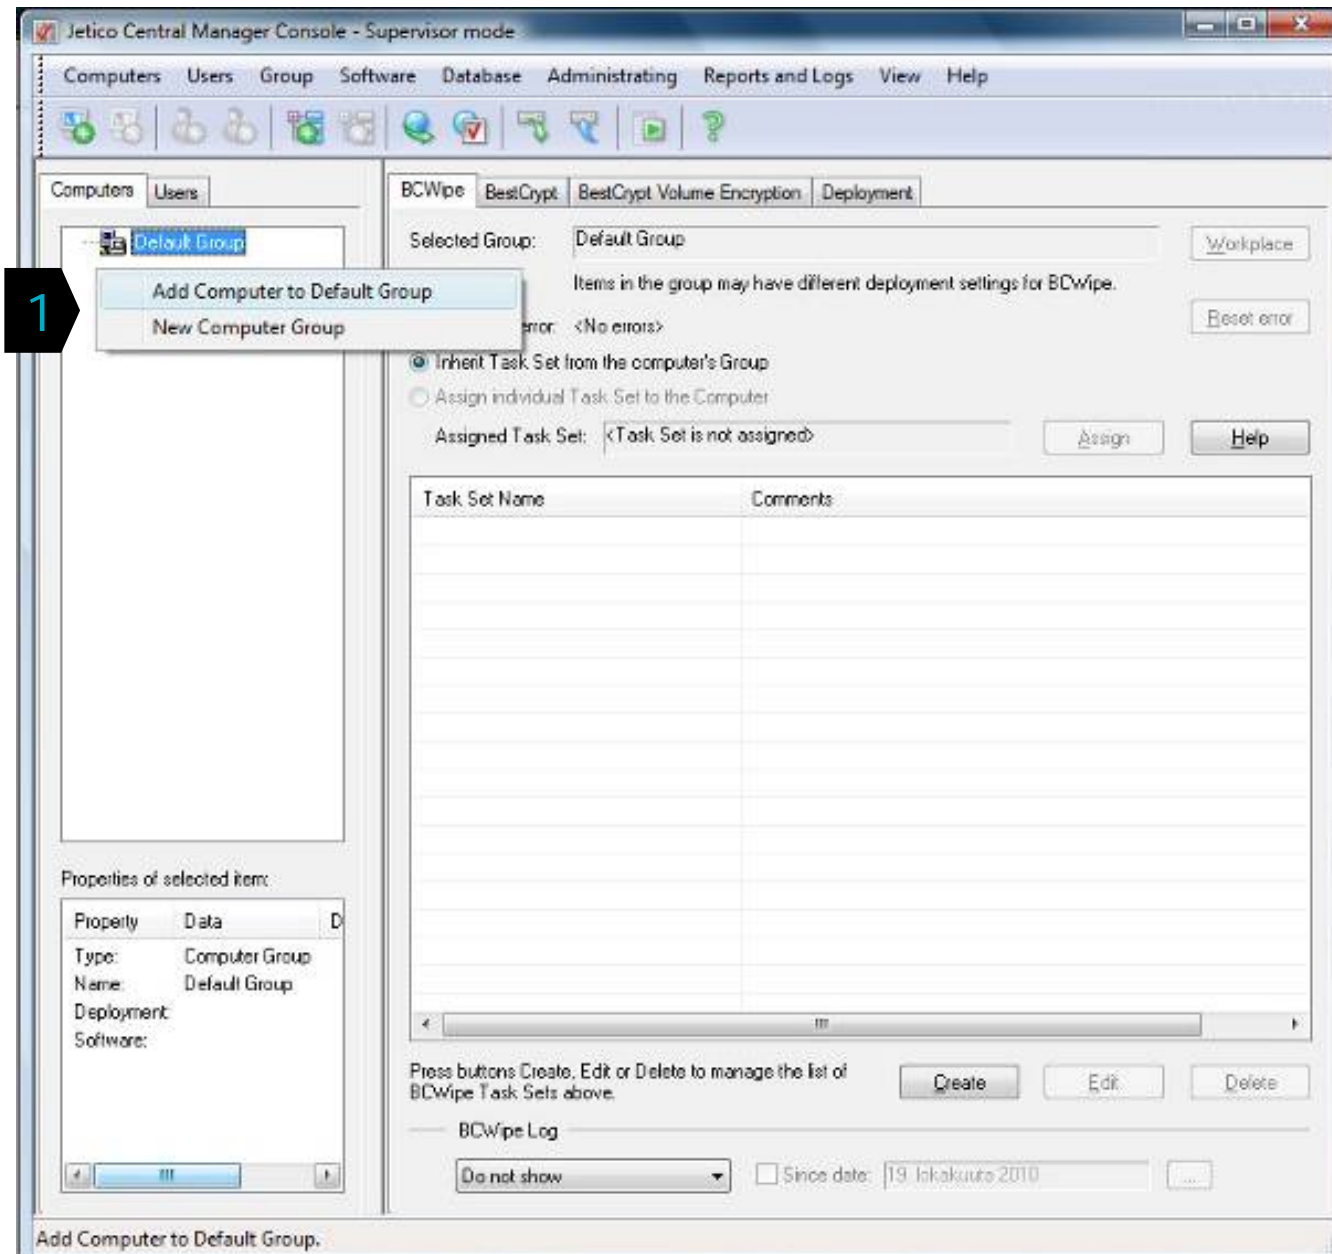

> Select client software to be downloaded

- > Click **Run update** to download client software
- > Wait for JCM to complete download

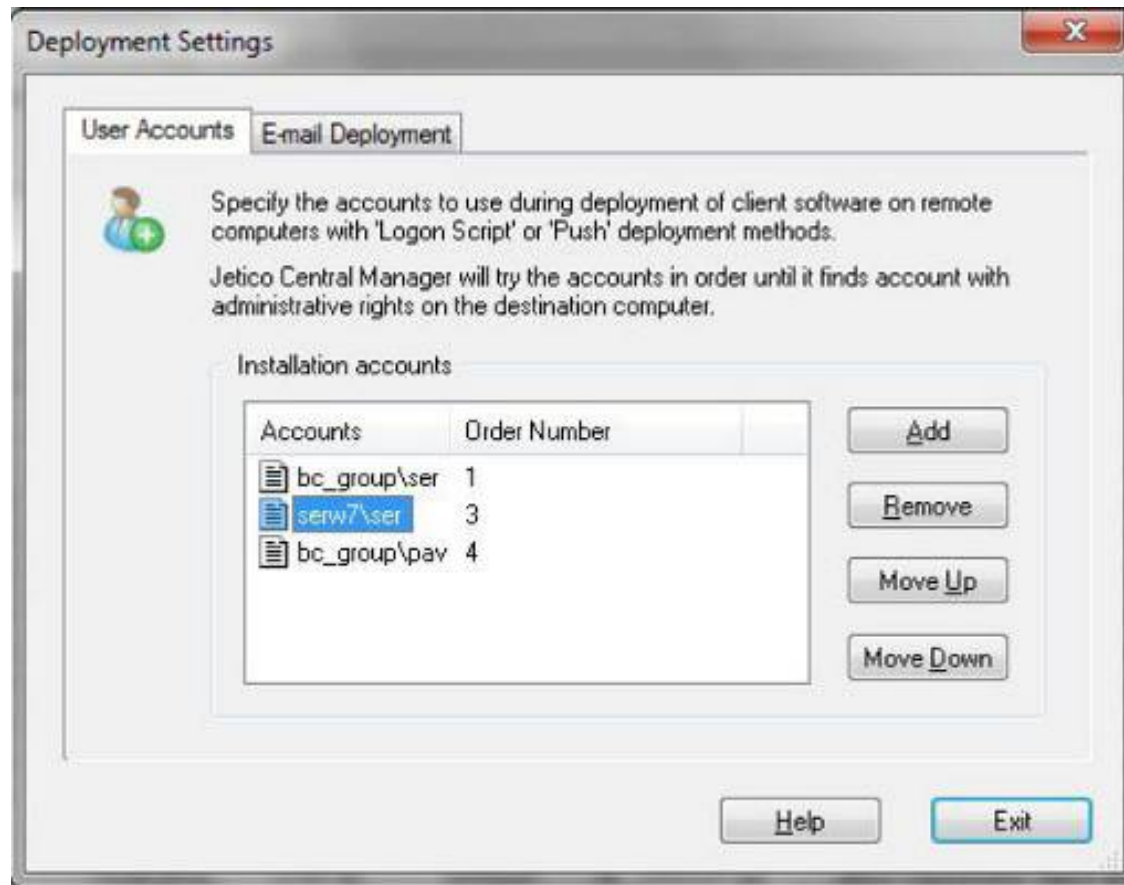

- > Right-click to add Computers or Groups from the network

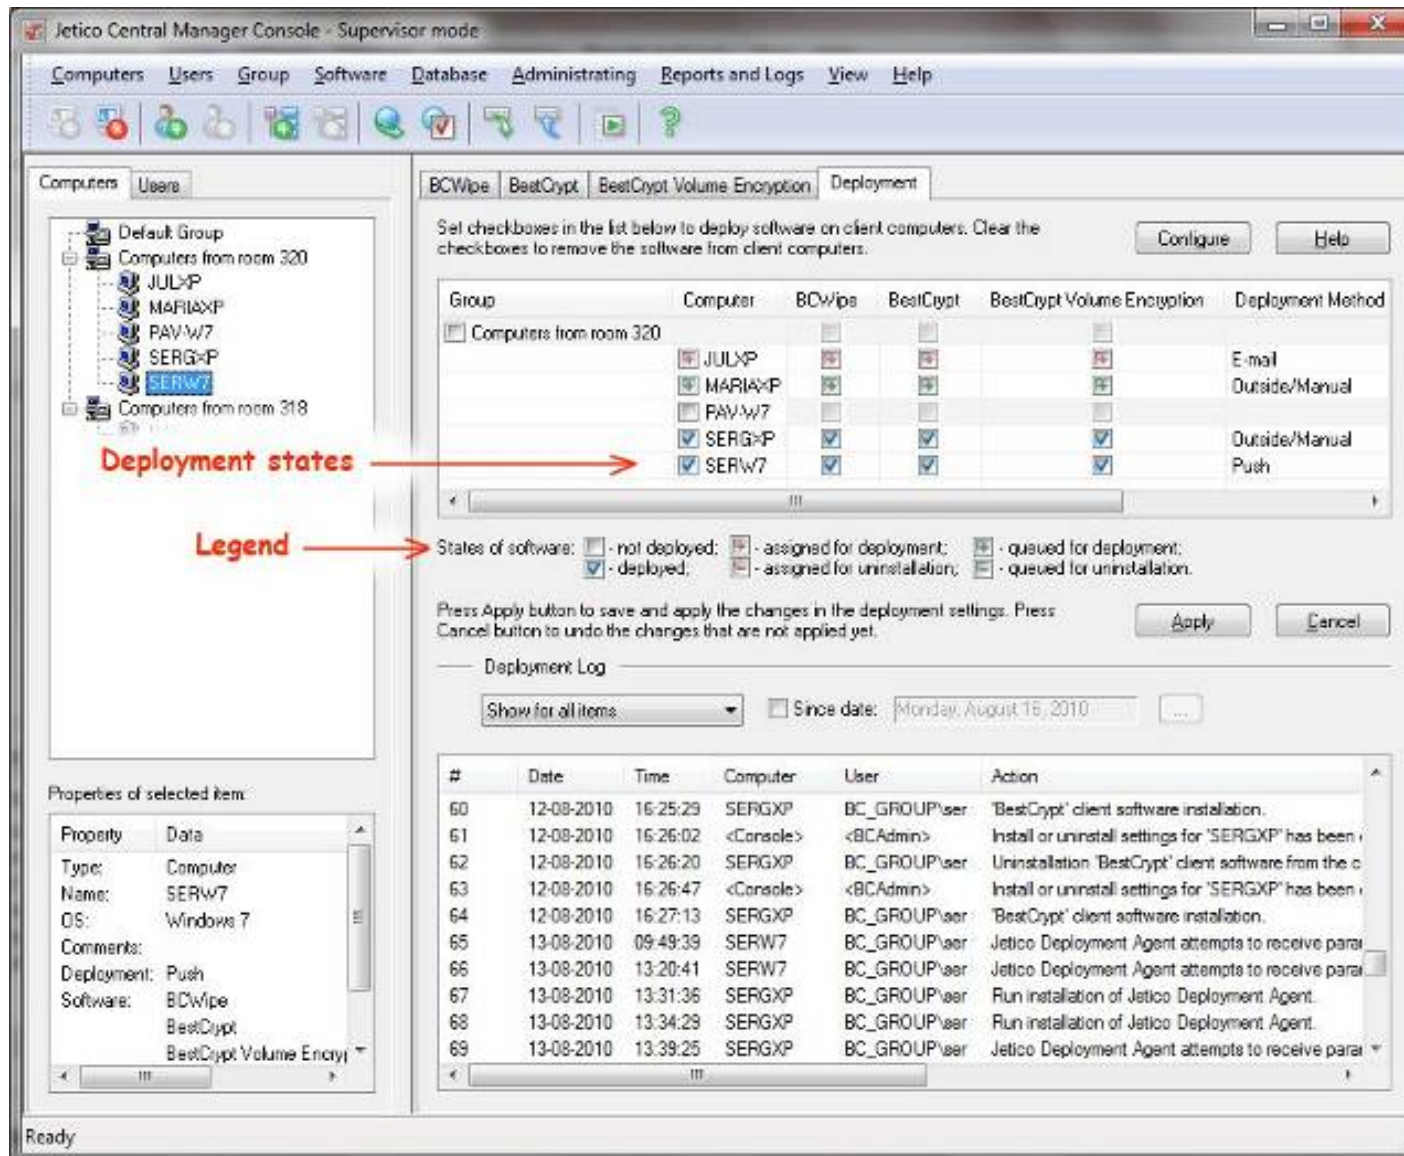

4 Deployment Methods:

- > Log-On Script
- > Push
- > Email
- > Outside/Manual
(third-party tools, such as Microsoft SCCM or LANDesk)

- > Configure deployment settings
- > Check network settings of user workstations in the enterprise network
