The table of contents is empty because none of the paragraph styles selected in the Document Inspector are used in the document.

1. Minimum System Requirements

- 3.7 MB disk space
- Intel-based Mac computer

2. Supported Operating Systems

BestCrypt Container Encryption for Mac supports the following operating systems, including 32-bit and 64-bit versions:

- Mac OS X 10.5+

3. Product Updates

09-September-2011 | v.1.2

New features:

- Keyboard filtering protects BestCrypt container passwords from being intercepted by key loggers by encrypting the password during input.
- Container Guard protects you from accidentally deleting or renaming container files when active.
- AES hardware acceleration utilizes the latest Intel processors to considerably speed up AES encryption and decryption.

Fixes:

- Fixed an issue with BestCrypt forgetting registration with a valid license.
- Fixed a number of compatibility issues with legacy containers.
- Fixed container creation issues on Mac OS X 10.5 Leopard.

03-August-2011 | v.1.1

BestCrypt now supports ejecting containers after user inactivity timeout.

Tray icon now shows if any containers are mounted.

Tray icon can now be configured to be hidden.

Fixed a problem with BestCrypt crashing when mounting containers on specified location.

Fixed hidden part creation issues on FAT16.

License upgrade now behaves correctly.

Fixed a number of problems with mounting and ejecting containers from tray icon.
