BestCrypt Volume Encryption™
Simply the Best TrueCrypt Alternative for Windows

Jetico and Humana People to People:
A BestCrypt Success Story

THE CHALLENGE

Humana People to People is a large network of over 30 organizations with a presence on four continents. Every day, over 10,000 employees must deal with highly sensitive information such as:

- Financial statements and reports for donors
- Student information at Humana's schools
- Employee information
- HIV test results

For years, the protection of this data was in TrueCrypt's hands. But after the popular open-source encryption solution was discontinued, and the number of TrueCrypt-incompatible Windows 8 computers in the organization continued to grow, Humana knew it was time to search for an alternative.

THE SEARCH

A focus on security without reducing user-friendliness was critical in the company's decision. The last thing Humana wanted to do was increase their employees' workload or threaten their effectiveness.

As Humana technicians began the search for a cost-effective TrueCrypt alternative to encrypt their new computers, they knew they needed to think about their users first. "TrueCrypt's cost was an important factor; however, what we really liked about it was the ease of use. . . . Our computers and information are mainly handled by non-technical people, such as doctors, nurses and teachers," explains Jesper Wohlert, Humana's Director of European Partnerships. "That's why 'the simpler, the better' became our motto."

Jetico's BestCrypt Volume Encryption, available for a 21-day trial, looked like it would do what they wanted it to do: encrypt entire disks with ease. But to be completely sure about their final decision, they also tested two other leading encryption solutions: open-source DiskCryptor and Windows 8's built-in utility, BitLocker. But neither impressed Humana's team as BestCrypt had: "DiskCryptor crashed several computers and was difficult to install, while BitLocker from Windows 8 Pro is not always easy to get."

Profile: Humana People to People is a network of over 30 organizations engaged in international solidarity, cooperation and development in Europe, Africa, Asia and the Americas. Their development work is rooted in a commitment to fight alongside the poor in a collective process that supports people to make changes, improve their lives and solve their problems.

Industry: Non-profit

Employees: 10,000

Need for Encryption: Confidentiality of personal, financial and medical information

---

" BestCrypt fulfilled our technical requirements, plus it turned out to be even easier than TrueCrypt!

" Unlike similar companies, Jetico's response to our needs was immediate [and] extremely positive.

" Thanks to Jetico, all our computers are now protected from unwanted eyes.

Jesper Wohlert, Director of European Partnerships, Humana People to People

---

THE SOLUTION

After evaluating their options, Humana decided to deploy BestCrypt Volume Encryption for all Windows 8 laptops within the organization.

"BestCrypt looked immediately like the right solution for all our needs," Wohlert explains. "Its similarity with our former encryption tool eliminated any potential learning curve for our users, maintaining their productivity the same as always."

Jetico's solution is now successfully installed on a wide variety of computer models across Humana's network.

Why BestCrypt Volume Encryption?

- Best TrueCrypt Alternative
- Encrypt Entire Partitions or Volumes
- Support for Windows 8 and 10
- Easy to Use
- Responsive, Reliable Company

Data Protection **Pure & Simple**

BestCrypt Volume Encryption™
Simply the Best TrueCrypt Alternative for Windows

About BestCrypt Volume Encryption

BestCrypt Volume Encryption is used to protect all data on entire hard drives in case of lost computers or stolen laptops. With pre-boot authentication, this program delivers superior whole-disk encryption for all data stored on fixed or removable storage devices.

Compared with traditional full-disk encryption, BestCrypt Volume Encryption offers the following added benefits:
- More flexible solution (can work on RAID)
- More user-friendly tool
- Lighter performance impact

Jetico announced support for Windows 8 in 2012, months before the operating system was commercially released. Licensed per endpoint, the current version of BestCrypt Volume Encryption also includes full support for Windows 10 and is compatible with the latest UEFI-based computers from all known major brands.

ALSO AVAILABLE

BestCrypt Volume Encryption – Enterprise Edition
- *Centralized management of disk encryption*
- *Centralized deployment and monitoring*
- *IT admins empowered with password recovery for rapid restoration of encrypted client data in emergencies*

BestCrypt Container Encryption
- *Guarantees protection of your sensitive files or folders on an active computer, shared workstation, or network storage — even the cloud*
- *Provides reliable encryption for files on any fixed drive or removable storage media in order to prevent data leaks from virtual threats*
- *Available for Windows, Mac OS X, Linux and Android (Beta)*

About Jetico

Jetico provides pure and simple data protection software for National Security, Compliance and Personal Privacy. Powerful yet easy to use, BCWipe and BestCrypt are engineered for a wide range of users from experts at large organizations to people at home.

Our Company:
- Trusted for over 10 years by the U.S. Department of Defense and all top-10 defense contractors
- Focused expertise with highly responsive agility, both technically and commercially
- Over 1 million users in over 100 countries
- Over 20 years of experience

Our Mission and Vision:
We are the best solution to protect data at rest. Beyond unbreakable data protection, the best security works the way you do – naturally and transparently.
