

BestCrypt
Volume Encryption ™

Securely Encrypt Entire Drives

For Windows

SUPERIOR DISK ENCRYPTION

Sometimes the weakest link in your enterprise security is the user. If a laptop or USB stick carrying sensitive records gets lost, your company is exposed to potential data theft and regulatory penalties (e.g., GDPR, HIPAA).

15+ years ago, Jetico introduced the world's first native encryption software for disk volumes — BestCrypt Volume Encryption. BestCrypt delivers superior encryption for protecting sensitive information without sacrificing performance.

- **Speed** — Encrypts data on the fly faster than an average driver can save it; no performance drag even on SSDs or NVMes
- **Privacy** — Secures data with the strongest encryption algorithms and brute force protection; doesn't include backdoors
- **Flexibility** — Delivers the only independent alternative to native OS encryption on Windows; central management included

MAIN FEATURES

Physical Threats Protection
Protect sensitive information on stolen computers and lost devices.

Best Firmware Support
Industry-best firmware support — including UEFI, GPT and RAID.

Trusted Algorithms & Modes
Choose from 5 encryption algorithms with XTS or LRW modes.

Extra Cyberattack Resilience
Added protection against brute-force attacks (e.g., scrypt key algorithm).

Central Management
Remotely manage disk encryption — on-premise or cloud.

BENEFITS & ADVANTAGES

- **Peace of mind for privacy**
- **Built-in regulatory compliance**
- **Ransomware protection**
- **World's only OS agnostic tool**
- **No backdoors**

BestCrypt Volume Encryption™

Securely Encrypt Entire Drives
For Windows

TECHNICAL SPECIFICATIONS

Core Features

- Encrypt every sector, including entire OS
- Encrypt all types of volumes residing on fixed and removable disks
- Support for Secure Hibernation

Authentication

- Start OS only with right password (Pre-Boot Authentication)
- Rely on Multi-Factor Authentication (USBs, TPM and hardware tokens)
- Support for Single Sign-On *New*

Transparent OS Integration

- Integrate with Windows Recovery Environment *New*
- Customize graphical pre-boot screen *New*
- Full support for modern UEFI-based computers (no need to disable Secure Boot)

Added Security

- Measure password strength
- Built-in protection from brute-force attacks
- Protect from cyberattacks with BestCrypt Data Shelter *New*

DEPLOYMENT OPTIONS

Standalone Endpoints

Install, activate and manage BestCrypt on standalone endpoints.
Best for smaller teams.

Central Console (On-Premise)

Host BestCrypt central management console on-site. Remotely deploy, manage, set policies and recover encrypted data in case of emergency.
Best for larger teams.

Cloud

Host BestCrypt in the Jetico Cloud. Access from anywhere with just a browser. Deploy, manage, set policies and recover encrypted data in case of emergency. Supports multi-company management.
Best for large enterprises and MSPs.

NEED TO ENCRYPT SELECTED FILES?

Use **BestCrypt Container Encryption** to protect selected files from virtual threats — hackers, cloud
www.jetico.com/bc-container-encryption

NEED TO WIPE DATA?

Use **BCWipe** to securely erase entire hard drives and selected files beyond forensic recovery
