

BCWipe Total WipeOut™

Securely Erase Entire Drives
For HDD, SSD, SSHD, NVMe & Mac

ADISA Certified Software

LEAVE NO TRACE BEHIND

Trusted by the U.S. Department of Defense, BCWipe Total WipeOut protects all types of drives (servers, desktops, laptops, removable media) in these use cases:

- Secure disposal when upgrading to a new system
- Wiping before sending for physical destruction
- Clearing to decommission or repurpose between classified programs
- Hard drive with proprietary information fails under warranty
- Donating computers to the community

BCWipe Total WipeOut provides peace of mind and compliance with multiple regulations, including NIST SP 800-88, GDPR, HIPAA and PCI DSS.

Allowing you to save time, resources and money, network wiping is the ideal solution for large enterprises and e-waste centers.

MAIN FEATURES

Secure Erasure

Securely erase all traces of data beyond forensic recovery.

Wipe Over Network

Erase drives on multiple PCs simultaneously over the network.

Support for All Storage Media

Industry-best support for media, e.g., SSD, NVMe & Mac chips (T2,M1,M2).

Wiping Schemes

Choose from 15+ wiping schemes for compliance with regulations.

Tamper-Proof Erasure

Generate 100% tamper-proof reports for compliance.

BENEFITS & ADVANTAGES

Privacy for
peace of mind

Compliance with
regulations

Unlimited wipes
licensing option

Donate to help
communities

Eco-friendly
reduce e-waste

TECHNICAL SPECIFICATIONS

- Full disk wiping, including boots records, file system structures, operating system files, Host Protected Area (HPA), Device Configuration Overlay (DCO)
- Effective wiping on SSD and NVMe
- Support for drive-type-specific wiping policies [New](#)
- Support for newest Mac processors (T2, M1 and M2)
- Compatibility with Microsoft's SecureBoot
- Support for hardware commands (e.g., TRIM, ATA Erase)
- Low-level verification upon completion
- Remote wiping with centralized management
- Web-based interface from any device [New](#)
- Centralized wiping policies with one click
- Tamper-proof erasure reports [New](#)
- Storage of complete history of operations
- Automation of tasks for individual computers and groups
- Hardware diagnostic tests [New](#)
- Wipe drives connected through IDE, SATA, SCSI, PCI-E, M.2 (NVME), iSCSI(SAN) and removable disk devices
- Automatically unfreeze drives before using ATA secure erase [New](#)
- High-performance wiping
- Support for role-based access control [New](#)
- Support for several booting options (PXE and CD/DVD, USB) [New](#)

DEPLOYMENT OPTIONS

Use a web browser interface to erase drives on multiple computers simultaneously over the network.

Create a bootable disk (CD/DVD or USB flash drive) and run it on any computer.

NEED TO WIPE SELECTED FILES?

Use **BCWipe** to securely erase files beyond forensic recovery on active computers — data remanence, data spills
www.jetico.com/bcwipe

NEED TO ENCRYPT DATA?

Use **BestCrypt** to protect selected files or all data on whole disks — hackers, cloud, lost hardware
